

Energy Policy Statement

Linde Material Handling (UK) Ltd are manufacturers of materials handling equipment and as such, this policy statement covers all activities of the organisation whether directly or indirectly involved in the manufacture of its finished products and supporting infrastructure.

Our aim at Linde is for continual improvement in Energy Performance. This includes, where possible, preventing energy usage at source, taking into consideration business objectives, employees, the local community and continual improvement of the Energy Management System.

In particular -

- 1 To develop and maintain an Energy Management System with the aim of meeting the requirements of the ISO 50001 standard.
- 2 To uphold legal and other requirements regarding energy use, consumption and efficiency.
- 3 To ensure continual improvement in our energy performance and EnMS.
- 4 To ensure information and resources to achieve our objectives and targets.
- 5 To minimise energy usage through consideration of energy performance improvements in design and modification of our facilities, equipment, systems and processes. Establish, measure and review objectives and targets for the reduction in use of gas and electricity.
- 6 To reduce any processes where energy concerns exist, where practicable.
- 7 To ensure that future manufacturing processes and related service activities are given due energy usage consideration.
- 8 To communicate this policy to our customers and suppliers to encourage their involvement.
- 9 To promote and encourage policy awareness amongst employees and increase awareness by improvement Training.
- 10 To support the purchase of energy efficient products and services, and design for energy performance improvement.

Copies of this Energy Policy Statement and further information on objectives and improvements are available to the public and can be obtained from the Health, Safety & Environmental Officer or the Personnel Office.

Massimiliano Sammartano
